

## Report on

**Event:** Orientation programme for **“YOUNG INDIA -LIFESCIENCE SKILLING PROGRAM”**

**Date:** 10<sup>th</sup> October, 2024

**Objective:** To highlight the importance of being industry ready and make them aware about the skilling initiative

**Report:** The speaker Mr.V.V.K.Rao addressed the MSc Organic Chemistry final year students about the aims of the **“YOUNG INDIA -LIFESCIENCE SKILLING PROGRAM”**. The broader objective is to provide certification as per established standards by World Economic Forum, provide opportunities for offline learning, impart high level skill development aligned with industry needs. He mentioned these efforts are being taken to channelize and empower the top talent in the healthcare sector and foster innovation. To be a part of the premier skilling program initiated through C4IR Telangana in collaboration with leading industry and academic partners students have to go through three steps: Checking their eligibility, taking qualification test and payment to enrol for the programme. Fifteen MSc. Organic chemistry final year students took the assessment in presence of speaker and two faculty members as invigilators. The results of the assessment would be intimated after two days. The students who clear this talent test assessment become eligible to take up three months training and six months paid internship with pharma company at their location.
